## Severe Weather Outlook Wednesday, December 02, 2020

# Hazardous Weather

A potential for moderate to major impacts across the northeast Panhandles with reduced visibility and hazardous road conditions possible due to snow packed roadways. Minor impacts are also expected across all but the southwest Texas Panhandle with once again reduced visibility possible and slick roadways, which may cause hazardous driving conditions to occur. Stay weather aware and continue to follow along with the latest forecast!

Snow will begin to fall Wednesday morning and continue through Thursday morning. Snowfall amounts range from 6-8 inches across the far eastern Oklahoma Panhandle and east northeast Texas Panhandle. The remainder of the Panhandles has a chance to see up to 4 inches of snow with decreasing amounts as you go further south and west.

# Hazardous Weather

## Wednesday's Forecast

Forecast High Temperatures and Rain Chances

- A cold front will move into our region late this afternoon, with breezy conditions expected near this front. Sustained winds of 20-25 MPH and gusts to around 30 MPH will be likely in these areas.

- Across East Texas, showers and a few thunderstorms will be likely, with rain chances decreasing towards the west.

- Severe weather is not expected, though occasional cloud-to-ground lightning strikes will be likely.

- Highs will range from the lower 60s across parts of Central Texas to the upper 40s near the Red River.

## Showers and Storms Expected Today

Cold front moving in from the west

Weather Forecast Office  
Houston/Galveston TX  
Issued Dec 02, 2020 4:13 AM CST

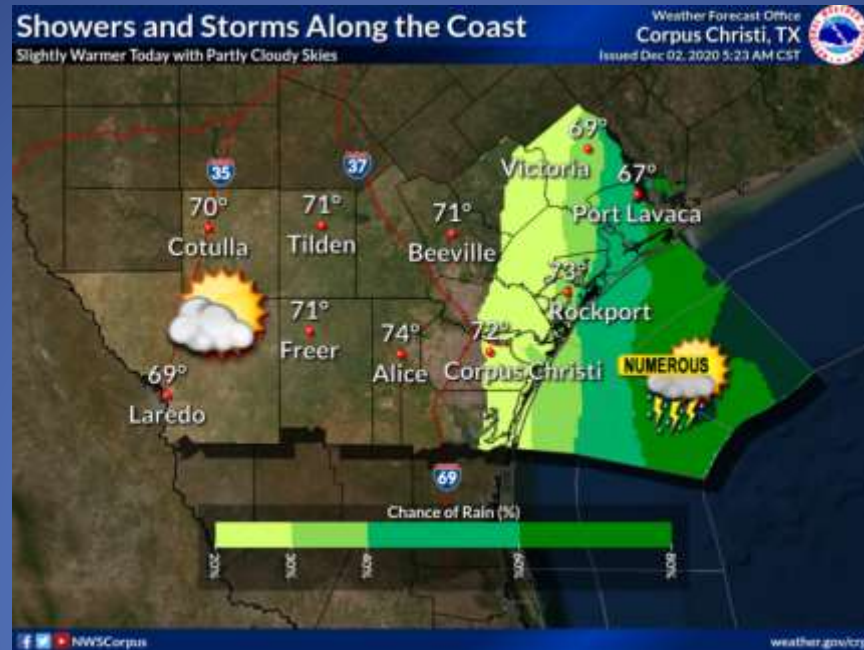

A cold front will move into our region later today, with gusty northwest winds expected west of this front. To the east, widespread showers and a few thunderstorms will develop over East Texas. Severe weather is not expected, though some occasional cloud-to-ground lightning strikes can be expected. Highs will range from the upper 40s (north) to lower 60s (south).

Showers and storms are expected today as a cold front moves through. It will also be breezy with gusts around 25 to 30 mph along the coast and over the waters. Highs from the upper 50s to mid 70s.

# Hazardous Weather

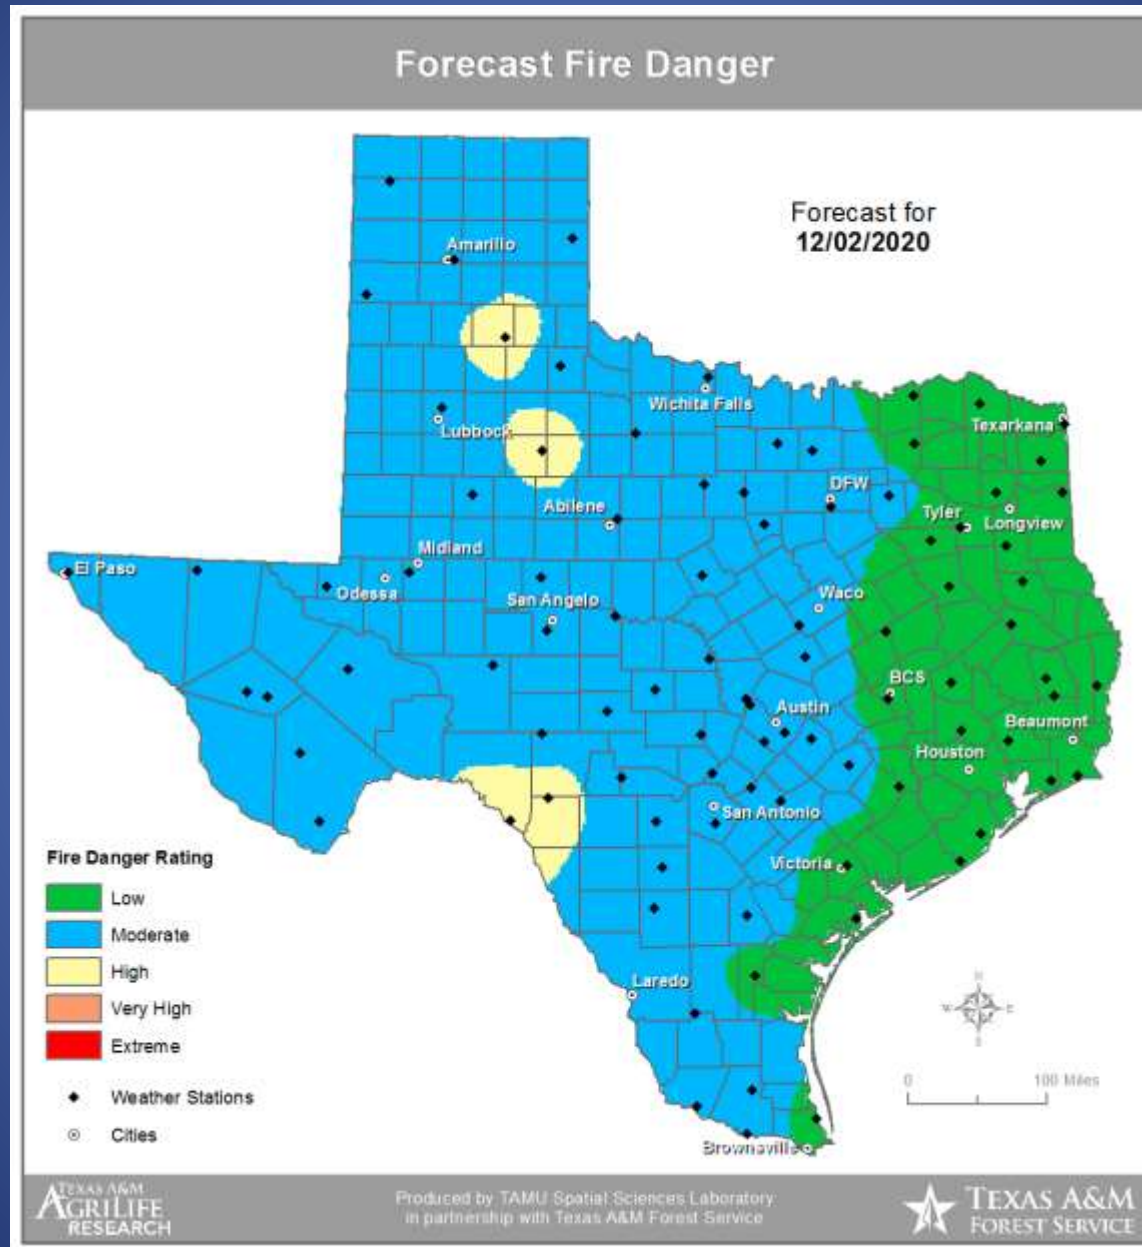

Showers and thunderstorms will be possible along the coast today. Clouds will begin to clear through the afternoon and temperatures will warm into the low to mid 70s for most.
